

Fish Tagging

- Tag and release live animals only.
- Be sure to tag the animal with the correct tag; **tags used on billfish and tunas are different than tags used on sharks.**
- See [Table 3](#) and above illustrations for samples to collect from tag recapture animals.
- **All** tag recaptures should be fully sampled if possible (*i.e.* weather permitting and without interfering with the processing of a kept fish).

Animals to tag:

Billfish/Tunas: swordfish
blue marlin
white marlin
sailfish
bluefin tuna
yellowfin tuna
albacore tuna
bigeye tuna
blackfin tuna
skipjack tuna

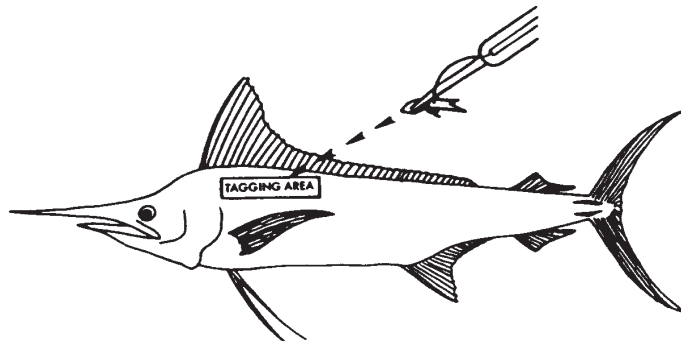

Figure 18. Tagging location for billfish and tunas.

Sharks: Identifiable species ONLY, excluding dogfish.
